

# FLY. All day. . .

# and into the night.

  
**REALFLIGHT**<sup>®</sup>  
R/C FLIGHT SIMULATOR  
**G3.5**<sup>™</sup>

Ask any RealFlight owner, and they'll tell you straight out: RealFlight and other flight sims are as different as night and day. And now that night flying has been moved from modeler's wish list to RealFlight G3.5, you can see the difference for yourself.

Fly the Grass Flatlands site, and you can enjoy PhotoField™ detail by day and a moonlit landscape by night. Take a morning flight on one of the 3D sites, and you can watch the world constantly change around you. Fly them by night, and the world shrinks to you and your aircraft in the darkness, flying by the light of runway markers and mysteriously glowing, floating, obstacles. But fly the night Carnival site, and you'll see an island of pulsating neon light in the night sky. You can pylon race around the Star Wheel's light show, do a low-level fly-by past the bright lights on the Midway...

But one thing you *don't* have to do is limit yourself. Because the truth is, you can turn *any* daytime 3D site into a night site — even in mid-flight — and fly it with any of the 50 aircraft RealFlight G3.5 offers.

Sound like fun? Then get the R/C flight sim that's been the modeler's #1 choice for over a decade: RealFlight. And G3 owners, remember: You can download G3.5 *free* from our web site! For more information, or the location of the hobby store nearest you, please visit [www.realflight.com](http://www.realflight.com) or call 1-800-682-8948 and mention code #4374K
