

*A new dimension for R/C's #1 flight simulator.*

# REAL FLIGHT<sup>®</sup>

R/C FLIGHT SIMULATOR

## G4<sup>™</sup>

You're coming in for a landing on a scenic lake or vast ocean — and that's OK, because you're flying on RealFlight G4, the flight simulator that lets you experience just what it feels like to set down, taxi and take off from water. Choose from several different aircraft equipped with floats. Fly on any of a number of sites that feature water. Be amazed at the clarity of the PhotoField<sup>™</sup> backgrounds — as well as realistic 3D touches such as constantly rippling water as it reflects sunlight and the responsive objects that can damage your model if involved in a collision. Observe how the water spreads out away from the spinning props or rotors.

The Seawind name is used with permission of Seawind Inc.

It was inevitable that after air and land, the next frontier for RealFlight to conquer was water, and G4 aces it! It's just another in the long list of enhancements to the R/C flight simulator that has been the #1 choice of modelers for over 10 years running. Ask to demo RealFlight G4 at your local hobby shop; it's making a big splash in the world of R/C!
